

**SPECIALTY PRODUCT****FLOOR ABSORBENT****FEATURES**

- Absorbs all types of water based spills
- Solidifies after collecting waste for easy disposal
- Economical, non-toxic, nonabrasive
- Water absorbant
- 100% Natural / Organic
- Non leaching
- Safe
- Super absorbent
- Can be incinerated

**PROPERTIES**

**Appearance:** Brown solid powder with irregular fibers.

**Boiling point:** Not Applicable

**Specific gravity:** 0.90 gr/cc

**Non volatiles:** 99 %

**Solubility in water:** Insoluble

**Density:** (water = 1) 1.5

**Storage stability:** Keep away from reactive metals and strong acids

**pH of liquid:** Not Applicable

**Flammability:** Non-flammable

**Packaging:** 20 Lb. Bag

- Properties are typical and subject to usual manufacturing tolerances.

FLOOR ABSORBENT is a coarse powder that quickly and easily absorbs chemicals, soil, vomit, water spills and organic waste spills whenever they occur. It will turn any spill into a fluffy, agglomerate substance on contact. FLOOR ABSORBENT has a powerful encapsulation capability that will eliminate messy and costly clean up and will also eliminate the fears of a spill spreading or leaching. It will not dissolve in water, so it can be collected with vacuum, broom, or pail and easily disposed. When using near flammable materials, keep away from all sources of ignition and flames, ventilate the area well. Control the source of spill while at the same time spreading FLOOR ABSORBENT, starting around the edges of the spill. Spread sufficient quantity of FLOOR ABSORBENT to cover entire area of spill and allow several minutes to absorb then collect material. Dispose of collected and absorbed material following regulations regarding disposal of waste when applicable. Refer to the label and SDS for additional instructions and precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by ChemTron.
