CT – 363 C

ODOR CONTROL

CITRUS BLOCK

PROFESSIONAL CLEANING PRODUCTS

FEATURES

- Citrus oil slow release block
- Works in all types of waste water reservoirs
- As it dissolves, dissolves grease and does not allow cake formation
- Safe to the environment
- Prevents blockage in traps and pipes
- Releases a pleasant citrus odor
- Does not stain nor contaminates the air
- Lasts up to 30 days

PROPERTIES

Appearance: Beige round or square solid block with citric odor

Dimensions: 5"x5"x12"

Specific gravity: solid, 0.8 gr/cc, (floats in water)

Melting Point: Greater than 200º C

Non Volatiles: 70%

Solubility in Water: Partial

Chemical Type: Terpenes and salts

Flammability: Non-flammable

Packaging: 4X 10 lb. case

- Properties are typical and subject to usual manufacturing tolerances.

CITRUS BLOCK is a continuous action, slowly dissolvable solid block, that releases into the water solution, in the waste' water pumping station, grease trap, reservoir, aerator, or manhole a combination of citrus solvents and nutrients. Simply hanging it by the net envelope holding it, submersed into solution, just below surface, it will prevent clogging of water flow lines and sludge formation and eliminates hydrogen sulfides. This product not only keeps surfaces free of accumulated organic waste and greases but as the level of the water raises and lowers, walls of the lift station are kept clean, and odor is controlled. If trap is heavily loaded with grease, it's suggested a manual cleaning of the trap be done before the placement of **CITRUS BLOCK.**

Refer to the attached SDS for additional precautions. The information contained in this safety sheet is aimed at creating a guide for the selection and use of the product. However, we are not responsible for any use not recommended by Chemtron.
